MemberPress Integration

Integrations · https://fluentsupport.com/docs/memberpress-integration/

MemberPress is a **WordPress** plugin for creating and managing membership sites, ideal for monetizing content or building a website community. Integrating it with **Fluent Support** displays an overview of the **Course Purchase History** of any **User**, including the **User Status** and **Course Name** with **Status** (recurring or not) on the **Ticket Entries** page.

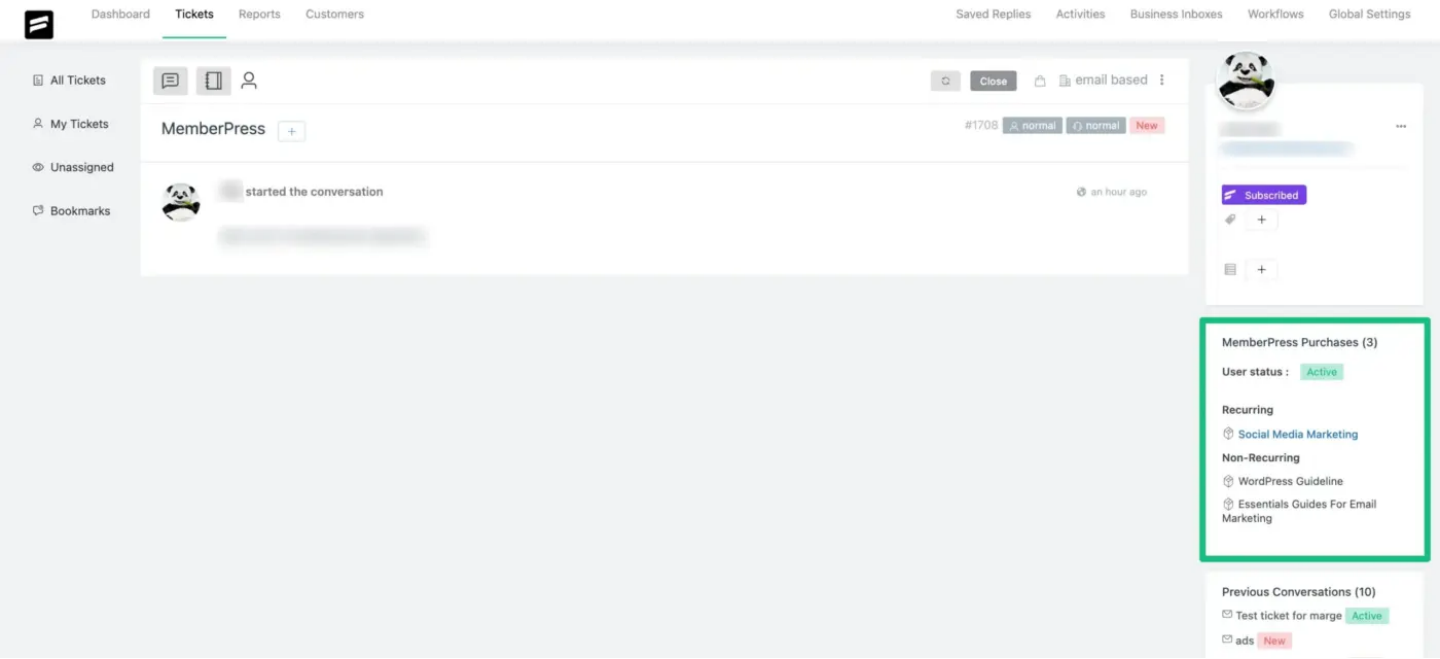

This article will guide you through integrating **MemberPress** with **Fluent Support**.

MemberPress Purchase Information In Your Ticket

You will only see **MemberPress** information in a ticket **if the user has enrolled** in any **courses from MemberPress**.

You **do not need to integrate** the **MemberPress** plugin **manually with Fluent Support**; it happens automatically if the MemberPress plugin is already installed on your site.

For example, here you can see a user purchased three courses from **MemberPress**, and the overview of course purchase history (User Status and Course Name with Status) automatically appeared on his ticket.

This is how the integration of **MemberPress** with **Fluent Support** works!

If you have any further questions, concerns, or suggestions, please do not hesitate to contact our **@support team**. Thank you.
